### 1 Introduction

LS2309x-G series products are complete GNSS receivers (also known as GNSS mouse) based on the proven technology found in LOCOSYS GNSS module ST-1612-G that uses STMicro chip solution. The GNSS mouse will track up to 32 satellites at a time while providing fast Time-To-First-Fix, one-second navigation updates and low power consumption. It can provide you with superior sensitivity and performance even in urban canyon and dense foliage environment. Its far-reaching capability meets the sensitivity requirements of car navigation as well as other location-based applications.
